

# Human AFP Protein

Cat. No. AFP-HM101

## Description

<b>Source</b>	Recombinant Human AFP Protein is expressed from Expi293 with His tag at the C-terminal. It contains Arg19-Val609.
<b>Accession</b>	P02771
<b>Molecular Weight</b>	The protein has a predicted MW of 67.6 kDa. Due to glycosylation, the protein migrates to 68-72 kDa based on Tris-Bis PAGE result.
<b>Endotoxin</b>	Less than 1EU per $\mu\text{g}$ by the LAL method.
<b>Purity</b>	> 95% as determined by Tris-Bis PAGE > 95% as determined by HPLC

## Formulation and Storage

<b>Formulation</b>	Supplied as 0.22 $\mu\text{m}$ filtered solution in PBS (pH 7.4). Please dilute to the desired concentration according to the concentration of the solution shown on the product label.
<b>Storage</b>	Valid for 12 months from date of receipt when stored at -80°C. Recommend to aliquot the protein into smaller quantities for optimal storage. Please do not repeated freeze-thaw cycles.

## Background

Alpha-fetoprotein is a shuttle protein that delivers nutrients through receptor-mediated endocytosis to embryonic cells. In adults, alpha-fetoprotein can shuttle drugs into alpha-fetoprotein receptor-positive myeloid-derived suppressor, regenerating and also cancer cells. Drugs with high-binding affinity to alpha-fetoprotein can activate or deplete targeted cells. Myeloid-derived suppressor cells activation leads to immune suppression that can be used for treating autoimmune diseases.

## Assay Data

### Tris-Bis PAGE

Human AFP on Tris-Bis PAGE under reduced condition. The purity is greater than 95%.

### SEC-HPLC

The purity of Human AFP is greater than 95% as determined by SEC-HPLC.
