

Human APOE4/Apolipoprotein E Protein

Cat. No. APO-HM202

Description

Source	Recombinant Human APOE4/Apolipoprotein E Protein is expressed from HEK293 with hFc tag at the N-Terminus. It contains Lys19-His317.
Accession	AAB59397.1
Molecular Weight	The protein has a predicted MW of 61.6 kDa. Due to glycosylation, the protein migrates to 63-67 kDa based on Bis-Tris PAGE result.
Endotoxin	Less than 1EU per μ g by the LAL method.
Purity	> 95% as determined by Bis-Tris PAGE

Formulation and Storage

Formulation	Supplied as 0.22 μ m filtered solution in PBS, 2mM DTT, 5mM CHAPS (pH 7.4).
Storage	Valid for 12 months from date of receipt when stored at -80°C. Recommend to aliquot the protein into smaller quantities for optimal storage. Please minimize freeze-thaw cycles.

Background

Apolipoprotein E (apoE) is a lipid carrier in both the peripheral and the central nervous systems. Lipid-loaded apoE lipoprotein particles bind to several cell surface receptors to support membrane homeostasis and injury repair in the brain. Considering prevalence and relative risk magnitude, the ϵ 4 allele of the APOE gene is the strongest genetic risk factor for late-onset Alzheimer's disease (AD).

Assay Data

Bis-Tris PAGE

Human APOE4 on Bis-Tris PAGE under reduced condition. The purity is greater than 95%.
