

Mouse CD300A Protein, Ultra Low Endotoxin

Cat. No. CDA-MM101-UL

Description	
Source	Recombinant Mouse CD300A Protein is expressed from HEK293 with His tag at the C-Terminus. It contains Leu28-Pro185.
Accession	Q6SJQ0-1
Molecular Weight	The protein has a predicted MW of 20 kDa. Due to glycosylation, the protein migrates to 35-50 kDa based on Bis-Tris PAGE result.
Endotoxin	Less than 0.01 EU per µg by the LAL method.
Purity	> 95% as determined by Bis-Tris PAGE > 95% as determined by HPLC

Formulation and Storage	
Formulation	Lyophilized from 0.22µm filtered solution in PBS (pH 7.4). Normally 8% trehalose is added as protectant before lyophilization.
Reconstitution	Dissolve the lyophilized protein in distilled water. Please refer to the Certificate of Analysis for detailed instructions.
Storage	-20 to -80°C for 12 months as supplied from date of receipt. -80°C for 3 months after reconstitution. Recommend to aliquot the protein into smaller quantities for optimal storage. Please minimize freeze-thaw cycles.

Background	
CD300a is an inhibitory receptor for mast cells and eosinophils in allergic inflammation (AI); however, the spatiotemporal expression of CD300a and its potential roles in the resolution of AI are still to be determined. CD300a expression on peritoneal cells is regulated from inflammation to resolution. CD300a activation on mouse bone marrow-derived mast cells regulated ALX/FPR2 expression levels following IgE-mediated activation.	

Assay Data

Bis-Tris PAGE

Mouse CD300A on Bis-Tris PAGE under reduced condition. The purity is greater than 95%.

SEC-HPLC

Mouse CD300A Protein, Ultra Low Endotoxin

Cat. No. CDA-MM101-UL

Assay Data

The purity of Mouse CD300A is greater than 95% as determined by SEC-HPLC.
