## Cynomolgus CLEC12A/MICL/CLL-1 Protein

## Cat. N

Cat. No.	CLE-CM12A	
Description	า	
Source		Recombinant Cynomolgus CLEC12A/MICL/CLL-1 Protein is expressed from HEK293 with His tag at the N- Terminus.
		It contains His32-Ala232.
Accession		A0A2K5WXQ6
Molecular Weight		The protein has a predicted MW of 24.6 kDa. Due to glycosylation, the protein migrates to 38-50 kDa based on Bis-Tris PAGE result.
Endotoxin		Less than 1EU per μg by the LAL method.
Purity		> 95% as determined by Bis-Tris PAGE
Formulation and Storage		
Formulation	l	Lyophilized from 0.22µm filtered solution in PBS (pH 7.4). Normally 8% trehalose is added as protectant before lyophilization.
Reconstituti	on	Centrifuge the tube before opening. Reconstituting to a concentration more than 100 µg/ml is recommended.

-20 to -80°C for 12 months as supplied from date of receipt.-80°C for 3 months after reconstitution.Recommend

CLEC12A has recently been identified as an antigen, expressed on leukemic stem cells and leukemic blasts. Given the fact that this expression profile seems stable throughout diagnosis, treatment and relapse on leukemic blasts and leukemic stem cells, CLEC12A can be considered a highly potent and reliable marker for the detection

of measurable residual disease and therefore applicable for risk stratification and prognostication in AML.

to aliquot the protein into smaller quantities for optimal storage. Please minimize freeze-thaw cycles.

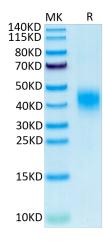

Dissolve the lyophilized protein in distilled water.

Background

Storage

**Assay Data** 

## **Bis-Tris PAGE**

Cynomolgus CLEC12A on Bis-Tris PAGE under reduced condition. The purity is greater than 95%.
