

Canine ENPP-3 Protein, Ultra Low Endotoxin

Cat. No. ENP-DM103-UL

Description	
Source	Recombinant Canine ENPP-3 Protein is expressed from HEK293 with His tag at the N-Terminus. It contains Arg46-Ile874.
Accession	A0A8I3N0F5
Molecular Weight	The protein has a predicted MW of 96.19 kDa. Due to glycosylation, the protein migrates to 110-130 kDa based on Bis-Tris PAGE result.
Endotoxin	Less than 0.001 EU per µg by the LAL method.
Purity	> 95% as determined by Bis-Tris PAGE > 95% as determined by HPLC

Formulation and Storage	
Formulation	Lyophilized from 0.22µm filtered solution in PBS (pH 7.4). Normally 8% trehalose is added as protectant before lyophilization.
Reconstitution	Dissolve the lyophilized protein in distilled water. Please refer to the Certificate of Analysis for detailed instructions.
Storage	-20 to -80°C for 12 months as supplied from date of receipt. -80°C for 3 months after reconstitution. Recommend to aliquot the protein into smaller quantities for optimal storage. Please minimize freeze-thaw cycles.

Background	
Ectonucleotide pyrophosphatase-phosphodiesterase 3 (ENPP3), a protein detected in the human uterus, has been found to play an important role in the development and invasion of tumours. It was recently discovered that ENPP3 was upregulated during the window of implantation in the human endometrium but its functional relevance remains elusive.	

Assay Data

Bis-Tris PAGE

Canine ENPP-3 on Bis-Tris PAGE under reduced condition. The purity is greater than 95%.

SEC-HPLC

Canine ENPP-3 Protein, Ultra Low Endotoxin

Cat. No. ENP-DM103-UL

Assay Data

The purity of Canine ENPP-3 is greater than 95% as determined by SEC-HPLC.
