#### Human GARP (S138G) & Latent TGF Beta 1 Complex Protein

from the TGF- $\beta$ &GARP complex.

Human GARP (S138G) & Latent TGF Beta 1 Complex Protein		K/\(• US	
Cat. No. GAT-H	M103		
Description			
Source	Recombinant Human GARP(S138G)&Latent TGF Beta 1 Complex Protein is expressed from HEK293 with His tag and Avi tag at the C-Terminus.		
	It contains His20-Leu628 (GARP(S138G)) & Leu30-Ser390 (Latent TGF Beta 1).		
Accession	Q14392(GARP(S138G))&P01137(Latent TGF beta 1)		
Molecular Weight	The protein has a predicted MW of 70.3 kDa (GARP(S138G))&41.4 kDa (Latent TGF Beta 1). Due to glycosylation, the protein migrates to 75-80 kDa (GARP(S138G))&15 kDa&42-48 kDa (Latent TGF Beta 1) based on Tris-Bis PAGE result.		
Endotoxin	Less than 1EU per $\mu$ g by the LAL method.		
Purity	> 95% as determined by Tris-Bis PAGE	GE	
	> 95% as determined by HPLC		
Formulation and	Storage		
Formulation	Lyophilized from 0.22µm filtered solution in PBS (pH 7.4). Normally 8% trehalose is added as protectant before lyophilization.		
Reconstitution	Centrifuge the tube before opening. Reconstituting to a concentration in Dissolve the lyophilized protein in distilled water.	more than 100 μg/ml is recommended.	
Storage	-20 to -80°C for 12 months as supplied from date of receipt20 to -80° reconstitution.2-8°C for 2-7 days after reconstitution.Recommend to al optimal storage. Please minimize freeze-thaw cycles.	•	
Background			
	GARP&Latent TGF Beta is a complex found on surface of many types TCR-mediated activation of Latent TGF- $\beta$ and thus promoting secretio the surface of immune cells and other cells recognizes RGD in LAP, re	n and activation of TGF- $\beta$ . Integrin $\alpha\nu\beta$ 8 on	

## Assay Data

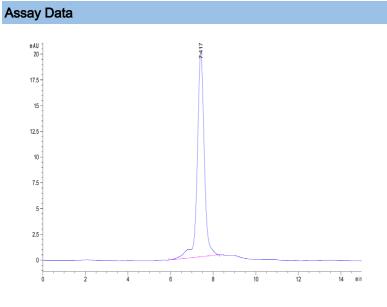

Human GARP (S138G) &Latent TGF Beta 1 Complex on Tris-Bis PAGE under reduced condition. The purity is greater than 95%.

### Human GARP (S138G) &Latent TGF Beta 1 Complex Protein

#### Cat. No. GAT-HM103

# ϗͶͼͽ·Ͷϩ

The purity of Human GARP (S138G) &Latent TGF Beta 1 Complex is greater than 95% as determined by SEC-HPLC.
