

Human HPN Protein

Cat. No. HPN-HM101

Description

Source	Recombinant Human HPN Protein is expressed from HEK293 with His tag at the C-Terminus. It contains Arg45-Leu417.
Accession	P05981
Molecular Weight	The protein has a predicted MW of 42 kDa. Due to the protein cleaved into the following two chains, so it migrates to 18-22 kDa and 30 kDa based on Bis-Tris PAGE result.
Endotoxin	Less than 1EU per μ g by the LAL method.
Purity	> 95% as determined by Bis-Tris PAGE > 95% as determined by HPLC

Formulation and Storage

Formulation	Supplied as 0.22 μ m filtered solution in 20mM NaAc, 150mM NaCl (pH 5.0).
Storage	Valid for 12 months from date of receipt when stored at -80°C. Recommend to aliquot the protein into smaller quantities for optimal storage. Please minimize freeze-thaw cycles.

Background

Home parenteral nutrition (HPN) has been proposed as the treatment of choice in patients suffering from intestinal failure (IF) and has been claimed to improve survival and quality of life either in patients with benign disorders or even in those with malignancies. HPN seems to have beneficial effect but it should be considered with caution by the physicians who should take into account the indications of each patient to receive parenteral nutrition, the underlying disease and prognosis and the access of each patient to home care services.

Assay Data

Bis-Tris PAGE

Human HPN on Bis-Tris PAGE under reduced condition. The purity is greater than 95%.

SEC-HPLC

Assay Data

The purity of Human HPN is greater than 95% as determined by SEC-HPLC.

ELISA Data

Human HPN, His Tag ELISA

0.2 μ g Human HPN, His Tag Per Well

Immobilized Human HPN, His Tag at 2 μ g/ml (100 μ l/Well) on the plate. Dose response curve for Anti-HPN Antibody, hFc Tag with the EC₅₀ of 14.9ng/ml determined by ELISA.
