

Cynomolgus IgE Protein

Cat. No. IGE-CM401

Description

Source	Recombinant Cynomolgus IgE Protein is expressed from HEK293 with His tag and Avi tag at the C-Terminus. It contains Lys208-Lys429.
Accession	G8F4W7
Molecular Weight	The protein has a predicted MW of 27.9 kDa. Due to glycosylation, the protein migrates to 35-40 kDa based on Bis-Tris PAGE result.
Endotoxin	Less than 1EU per μg by the LAL method.
Purity	> 95% as determined by Bis-Tris PAGE > 95% as determined by HPLC

Formulation and Storage

Formulation	Lyophilized from 0.22 μm filtered solution in PBS (pH 7.4). Normally 8% trehalose is added as protectant before lyophilization.
Reconstitution	Centrifuge the tube before opening. Reconstituting to a concentration more than 100 $\mu\text{g}/\text{ml}$ is recommended. Dissolve the lyophilized protein in distilled water.
Storage	-20 to -80°C for 12 months as supplied from date of receipt. -80°C for 3 months after reconstitution. Recommend to aliquot the protein into smaller quantities for optimal storage. Please minimize freeze-thaw cycles.

Background

Immunoglobulin E (IgE) is well known for its role in allergic disease, the manifestations of which are mediated through its two Fc receptors, Fc ϵ RI and CD23 (Fc ϵ R2). IgE and its interactions with these receptors are therefore potential targets for therapeutic intervention, and exciting progress has been made in this direction. Furthermore, recent structural studies of IgE-Fc, the two receptors, and of their complexes, have revealed a remarkable degree of plasticity at the IgE-CD23 interface and an even more remarkable degree of dynamic flexibility within the IgE molecule.

Assay Data

Bis-Tris PAGE

Cynomolgus IgE on Bis-Tris PAGE under reduced condition. The purity is greater than 95%.

SEC-HPLC

Assay Data

The purity of Cynomolgus IgE is greater than 95% as determined by SEC-HPLC.

ELISA Data

Cynomolgus IgE, His Tag ELISA

0.05µg Cynomolgus IgE, His Tag Per Well

Immobilized Cynomolgus IgE, His Tag at 0.5µg/ml (100µl/well) on the plate. Dose response curve for Anti-IgE Antibody, hFc Tag with the EC50 of 4.0ng/ml determined by ELISA.
