

Mouse LRP10 Protein

Cat. No. LRP-MM110

Description

Source	Recombinant Mouse LRP10 Protein is expressed from HEK293 with His tag at the C-Terminus. It contains Arg18-Lys441.
Accession	Q7TQH7
Molecular Weight	The protein has a predicted MW of 46.88 kDa. Due to glycosylation, the protein migrates to 55-62 kDa based on Bis-Tris PAGE result.
Endotoxin	Less than 1EU per µg by the LAL method.
Purity	> 95% as determined by Bis-Tris PAGE > 95% as determined by HPLC

Formulation and Storage

Formulation	Lyophilized from 0.22µm filtered solution in PBS (pH 7.4). Normally 8% trehalose is added as protectant before lyophilization.
Reconstitution	Centrifuge the tube before opening. Reconstituting to a concentration more than 100 µg/ml is recommended. Dissolve the lyophilized protein in distilled water.
Storage	-20 to -80°C for 12 months as supplied from date of receipt. -80°C for 3 months after reconstitution. Recommend to aliquot the protein into smaller quantities for optimal storage. Please minimize freeze-thaw cycles.

Background

LDL receptor-related protein (LRP) 10 was recently identified as a Parkinson's disease gene through genome-wide linkage and sequencing analysis, but its role in Parkinson's disease in various populations is still unclear.

Assay Data

Bis-Tris PAGE

Mouse LRP10 on Bis-Tris PAGE under reduced condition. The purity is greater than 95%.

SEC-HPLC

The purity of Mouse LRP10 is greater than 95% as determined by SEC-HPLC.
