

Human HLA-A*24:02&B2M&Survivin 2B (AYACNTSTL) Monomer Protein

Cat. No. MHC-HM430

Description	
Source	Recombinant Human Survivin 2B(HLA-A*24:02) Protein is expressed from HEK293 with His tag and Avi tag at the C-Terminus. It contains Gly25-Thr305(HLA-A*24:02), Ile21-Met119(B2M) and AYACNTSTL peptide.
Accession	AAA59600.1(HLA-A*24:02)&P61769(B2M)&AYACNTSTL
Molecular Weight	The protein has a predicted MW of 50.20 kDa. Due to glycosylation, the protein migrates to 53-63 kDa based on Bis-Tris PAGE result.
Endotoxin	Less than 1EU per µg by the LAL method.
Purity	> 95% as determined by Bis-Tris PAGE > 95% as determined by HPLC

Formulation and Storage	
Formulation	Lyophilized from 0.22µm filtered solution in PBS (pH 7.4). Normally 8% trehalose is added as protectant before lyophilization.
Reconstitution	Centrifuge the tube before opening. Reconstituting to a concentration more than 100 µg/ml is recommended. Dissolve the lyophilized protein in distilled water.
Storage	-20 to -80°C for 12 months as supplied from date of receipt.-80°C for 3-6 months after reconstitution.2-8°C for 2-7 days after reconstitution.Recommend to aliquot the protein into smaller quantities for optimal storage. Please minimize freeze-thaw cycles.

Background	
Survivin-2B, a known splice variant of survivin, has been reported to promote cell death in some cancer cells, although it keeps prosurvival function in others.survivin-2B promoted autophagy and further regulated cell death by accumulating and stabilizing IKK alpha in the nucleus.	

Assay Data

Bis-Tris PAGE

Human HLA-A*24:02&B2M&Survivin 2B (AYACNTSTL) Monomer on Bis-Tris PAGE under reduced condition. The purity is greater than 95%.

SEC-HPLC

Human HLA-A*24:02&B2M&Survivin 2B (AYACNTSTL) Monomer Protein

Cat. No. MHC-HM430

Assay Data

The purity of Human HLA-A*24:02&B2M&Survivin 2B (AYACNTSTL) Monomer is greater than 95% as determined by SEC-HPLC.
