

Human CD206/MMR Protein

Cat. No. MMR-HM106

Description

Source	Recombinant Human CD206/MMR Protein is expressed from HEK293 with His tag at the C-terminus. It contains Leu19-Ala1389.
Accession	P22897-1
Molecular Weight	The protein has a predicted MW of 158.34 kDa. Due to glycosylation, the protein migrates to 160-180 kDa based on Tris-Bis PAGE result.
Endotoxin	Less than 1EU per µg by the LAL method.
Purity	> 95% as determined by Tris-Bis PAGE > 95% as determined by HPLC

Formulation and Storage

Formulation	Supplied as 0.22 µm filtered solution in PBS (pH 7.4).
Storage	Valid for 12 months from date of receipt when stored at -80°C. Recommend to aliquot the protein into smaller quantities for optimal storage. Please minimize freeze-thaw cycles.

Background

Human mannose receptor 1 (hMRC1) is a transmembrane glycoprotein that belongs to the C-type lectin family and is expressed on the surface of most tissue macrophages. hMRC1 contributes to the binding and transmission of HIV-1 and is involved in the endocytic uptake of HIV-1 for subsequent antigen presentation.

Assay Data

Tris-Bis PAGE

Human CD206 on Tris-Bis PAGE under reduced condition. The purity is greater than 95%.

SEC-HPLC

The purity of Human CD206 is greater than 95% as determined by SEC-HPLC.
