

# Mouse PLXNA1 Protein

Cat. No. PLX-MM101

## Description

<b>Source</b>	Recombinant Mouse PLXNA1 Protein is expressed from HEK293 with His tag at the C-Terminus. It contains Ser28-Pro1242.
<b>Accession</b>	P70206
<b>Molecular Weight</b>	The protein has a predicted MW of 134.90 kDa. Due to glycosylation, the protein migrates to 140-160 kDa based on Tris-Bis PAGE result.
<b>Endotoxin</b>	Less than 1EU per µg by the LAL method.
<b>Purity</b>	> 95% as determined by Tris-Bis PAGE > 95% as determined by HPLC

## Formulation and Storage

<b>Formulation</b>	Lyophilized from 0.22µm filtered solution in PBS (pH 7.4). Normally 8% trehalose is added as protectant before lyophilization.
<b>Reconstitution</b>	Centrifuge the tube before opening. Reconstituting to a concentration more than 100 µg/ml is recommended. Dissolve the lyophilized protein in distilled water.
<b>Storage</b>	-20 to -80°C for 12 months as supplied from date of receipt. -20 to -80°C for 3-6 months in unopened state after reconstitution. 2-8°C for 2-7 days after reconstitution. Recommend to aliquot the protein into smaller quantities for optimal storage. Please minimize freeze-thaw cycles.

## Background

PlexinA1 (PlxnA1) is a transmembrane receptor for semaphorins, a large family of proteins that act as axonal guidance cues during nervous system development.

## Assay Data

### Tris-Bis PAGE

Mouse PLXNA1 on Tris-Bis PAGE under reduced condition. The purity is greater than 95%.

### SEC-HPLC

The purity of Mouse PLXNA1 is greater than 95% as determined by SEC-HPLC.
