

Mouse Syndecan-1 Protein

Cat. No. SYN-MM201

Description

Source	Recombinant Mouse Syndecan-1 Protein is expressed from HEK293 with hFc tag at the C-Terminus.
	It contains Gln23-Gly255.
Accession	P18828-1
Molecular Weight	The protein has a predicted MW of 51 kDa. Due to glycosylation, the protein migrates to 85-110 kDa based on Tris-Bis PAGE result.
Endotoxin	Less than 1EU per µg by the LAL method.
Purity	> 90% as determined by Tris-Bis PAGE
	> 90% as determined by HPLC

Formulation and Storage

Formulation	Lyophilized from 0.22µm filtered solution in PBS (pH 7.4). Normally 8% trehalose is added as protectant before lyophilization.
Reconstitution	Centrifuge the tube before opening. Reconstituting to a concentration more than 100 µg/ml is recommended. Dissolve the lyophilized protein in distilled water.
Storage	-20 to -80°C for 12 months as supplied from date of receipt. -20 to -80°C for 3-6 months in unopened state after reconstitution. 2-8°C for 2-7 days after reconstitution. Recommend to aliquot the protein into smaller quantities for optimal storage. Please minimize freeze-thaw cycles.

Background

Liver diseases such as liver cirrhosis, primary and metastatic liver cancers are still a major medical challenge. Syndecan-1 is one of the most important proteoglycans in the liver. Syndecan-1 is normally expressed on the surfaces of hepatocytes and cholangiocytes. Due to liver diseases the amount of syndecan-1 increases in the liver.

Assay Data

Tris-Bis PAGE

Mouse Syndecan-1 on Tris-Bis PAGE under reduced condition. The purity is greater than 90%.

SEC-HPLC

Mouse Syndecan-1 Protein

Cat. No. SYN-MM201

Assay Data

The purity of Mouse Syndecan-1 is greater than 90% as determined by SEC-HPLC.
