### Mouse TROP-2/TACSTD2 Protein

Cat. No. TRP-MM121

Description	
Source	Recombinant Mouse TROP-2/TACSTD2 Protein is expressed from HEK293 with His tag at the C-Terminus.
	It contains Gln25-Gly270.
Accession	Q8BGV3.1
Molecular Weight	The protein has a predicted MW of 28.8 kDa. Due to glycosylation, the protein migrates to 48-55 kDa based on Bis-Tris PAGE result.
Endotoxin	Less than 1EU per μg by the LAL method.
Purity	> 95% as determined by Bis-Tris PAGE
	> 95% as determined by HPLC

# Formulation and Storage

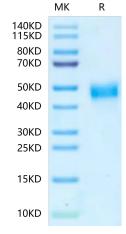

Formulation	Lyophilized from 0.22µm filtered solution in PBS (pH 7.4). Normally 8% trehalose is added as protectant before lyophilization.
Reconstitution	Centrifuge the tube before opening. Reconstituting to a concentration more than 100 µg/ml is recommended. Dissolve the lyophilized protein in distilled water.
Storage	-20 to -80°C for 12 months as supplied from date of receipt80°C for 3 months after reconstitution.Recommend to aliquot the protein into smaller quantities for optimal storage. Please minimize freeze-thaw cycles.

# Background

Trop-2,also known as epithelial glycoprotein-1 antigen (EGP-1),is a protein that in humans is encoded by the TACSTD2 gene. Mutations of this gene result in gelatinous drop-like corneal dystrophy, an autosomal recessive disorder characterized by severe corneal amyloidosis leading to blindness.

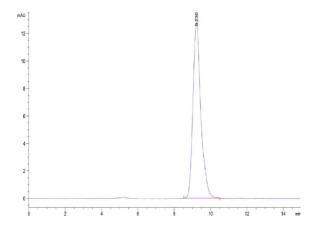

### **Assay Data**

#### **Bis-Tris PAGE**

Mouse TROP-2 on Bis-Tris PAGE under reduced condition. The purity is greater than 95%.

#### **SEC-HPLC**

The purity of Mouse TROP-2 is greater than 95% as determined by SEC-HPLC.
